

FREE WEB COUNTER

Get a free hit counter for your web site. Many people use them to get precise web site stats because it is really important to know how many visitors you have.

Why is our web counter better than the others?

- **It's totally free**
unlike other counters, we don't have any popups, the counter will always stay free you have our word
- **It's very fast**
thats why we call it 'Fast web counter'. We have top quality Intel Xeon servers on a 100mbit backbone, your counter will load faster than your website
- **Minimal formality**
we are not interested in your personal information. Easy to install - just cut and paste
- **It works on any website**
no CGI access needed. Any web host will do
- **Unlimited counters**
install as many counters as you wish, you can even count your subpage visitors

To install the counter simply paste the code below to your website changing the COUNTERNAME part. New counter will be automatically created. **You are not allowed to alter the html code in any way, if you do so the counter will be immediately deleted and your website banned from the program.**
